# Maintenance AND CLEANING

Wool is durable as well as beautiful, and will remain so if maintained properly. Regular vacuuming using a rotating brush will simultaneously brush your carpet and remove the dirt from it. Just like in clothing, wool naturally repels dirt and its natural elasticity makes it less prone to wear and tear.

In order to keep your carpet beautiful, it is important to know how to remove stains properly. What you need to do is take a dry, white towel and blot the stain lightly – do not rub! – to remove any residues from the carpet. After that, place a clean, wet, white towel over the stain. Exert pressure on the towel so it will soak up the stain. Wait until the towel is completely dry. Do not use any salt as this will affect the dye.
