**Matching:** This sample may not be from the same dye batch as current stocks and should be used only as a guide. Equal matching between widths cannot be guaranteed.

**Installation:** Professional installation is recommended and essential to a good quality underlay. Areas that might receive prolonged exposure to direct sunlight should be protected by the use of blinds or curtains.

**Cleaning:** Professional cleaning recommended.

**Maintenance:** To maintain your carpets appearance, it is recommended that it is vacuumed at least three times a week. It should be noted that overtime regular foot traffic will flatten the pile in main walkways, causing areas of differential wear. This can cause the carpet to show areas of light and dark shading, this happens to all quality velour carpets and would not be accepted as a basis for any complaint.

Fibre Shedding is a normal characteristic of heavy quality Viscose which gets considerably reduced after initial usage.

The superfine construction of Elegance gives a stunning shimmering effect, where the velour surface reflects light from different angles creating different colours effects, which makes the appearance of this product unique.
