| MANUFACTURING TOLERANCE                                                                                                                                                                         |  | (±) These details are approximate. Due to method of manufacture perfect pattern and/or colour matching cannot be guaranteed. In cut-pile carpeting, in rare cases, shading/pile reversal may occur without affecting its fitness for use. Shading/pile reversal can not be considered as a manufacturing or a material defect and will not affect the durability of the carpet. |                |                  |                                                                                     |
