

Industrial vacuum cleaners

Industrial vacuum cleaner 3450

19.15100

Powerful industrial vacuum cleaner, 3-engined, with filter class M, incl. filter cleaning system, incl. accessories.

The industrial vacuum cleaner 3450 has 3 individually switchable bypass suction motors in a robust metal housing, isolated to reduce the loudness. Two placed at the sides handles allow easy lifting the motor head.

A vacuum indicator allows the continuous monitoring of the proper operation and possible filter clogging. A warning light shows any filter problems.

This industrial vacuum cleaner has a star filter with 3m² filter surface. By external filter cleaning device the filter is moved vertically is cleaned in order to guarantee a long service life of the filter and a constant suction output.

The mobile storage container can be lowered and be emptied quickly and safely. The vacuum cleaner is mounted on a robust steel frame with non-marking castor wheels and brake.

Technical specifications:

Power:	3450 W (3 engines 230 V / 50 Hz)
Airflow:	540 m ³ /h
Negative pressure:	25 kPa
Capacity:	60 l
Filter surface:	30000 cm ²
Weight:	68 kg
Size:	65 x 66 x 134 cm
Filter class:	M

Accessories (Incl.):

Hose 50mm nominal diameter, length: 5m, suction tubes, floor nozzle.

H-filter for industrial vacuum cleaner 3450

19.15111

Filter class H

Industrial vacuum cleaner 2300

19.15120

Powerful industrial vacuum cleaner, 2-engined, with filter class M, incl. filter cleaning system, incl. accessories.

The industrial vacuum cleaner 2300 has 2 individually switchable 1150 watt bypass suction motors in a robust metal housing.

A vacuum indicator allows the continuous monitoring of the proper operation and possible filter clogging. A warning light shows any filter problems.

This industrial vacuum cleaner has a big cartridge filter with 3m² filter surface. Including semi-automatic and highly efficient cartridge filter cleaning with powerful air pulses for an even longer life of the filter and constant suction output.

The mobile storage container can be lowered and be emptied quickly and safely. The vacuum cleaner is mounted on a robust steel frame with non-marking castor wheels and brake.

Technical specifications:

Power:	2300 W (2 engines 230V / 50Hz)
Airflow:	360 m ³ /h
Negative pressure:	25 kPa
Capacity:	20 l
Filter surface:	30000 cm ²
Weight:	35 kg
Size:	50 x 48 x 90 cm
Filter class:	M

Accessories (Incl.):

Hose 38mm nominal diameter, length: 5m, suction tubes, floor nozzle.

M-filter for industrial vacuum cleaner 2300

19.15126

Filter class M

H-filter set for industrial vacuum cleaner 2300

19.15127

Set incl. spacer ring and tensioners for industrial vacuum cleaner 2300 for conversion to filter class H
