Life in the urban jungle is fascinating, but sometimes it can also be pretty loud, hectic and tumultuous. We may well want things a bit calmer when we come inside. But exotic is still fine! This collection meanders its way through the living room, kitchen and along the hallway with subtle animal prints. Shimmering, iridescent walls become a wild expanse for reptiles, birds and fishes. Dark red or petrol feathers adorn your home, in a sophisticated and artistic design. Beige snakeskin or scale-like, metallic-effect surfaces provide a chic look. But no matter which wallcovering you choose, you can now enjoy a bit of nature every day. All from your sofa.
